

Hatteras 64 Motor Yacht

By George L. Petrie

Based on the similarities in appearance, you might assume that the Hatteras 64 is a rehashed version of the builder's recent 6300 Raised Pilot-house. But beneath her curvaceous deckhouse, the 64 is all new.

Using extensive customer input, Hatteras created an all-new interior layout for the 64 Motor Yacht that offers almost

ten percent more living area. The full-beam saloon offers some 190 square feet of space for entertaining, with a sliding glass door that opens onto a 106-square-foot covered aft deck. This indoor-outdoor combo rivals the living room/family room of a typical suburban home or condo, and that's without even considering the 146-square-foot galley and dinette area, which is on an elevated portion of the main deck forward flanking the centerline helm station. Even the flying bridge is grand, offering a 289-square-foot outdoor space along with room for a 14-foot tender and davit.

Offered in a standard three-stateroom, three-head layout, the lower deck is equally voluminous. There's a full-beam master suite with an adjoining private head that boasts a tub, not just a shower. Port-side guest and bow VIP staterooms,

each with an adjoining private head, are also spacious. Hatteras offers the 64 in a four-stateroom, three-head layout as well, with a reconfigured master stateroom/head arrangement and a fourth stateroom on the starboard side.

Although much about the 64 is new, many features are vintage Hatteras, like a tough, solid-fiberglass bottom with a double chine to knock down spray. Deep reduction gear ratios let her turn larger propellers for greater efficiency, while tunnels permit flatter shaft angles and reduced draft. Standard twin 1,000-hp Caterpillar C18s should deliver cruise speeds in the mid-20-knot range and a top speed around 28 knots. Several engine options are offered, ranging up to twin 1,550-hp Caterpillar C30s or 1,500-hp MTU 12V2000 diesels. ⚙️
