

HATTERAS

Debuting at the Fort Lauderdale International Boat Show was the 80 Motor Yacht Sky Lounge, an enclosed-bridge edition that takes an already spacious arrangement and makes it the category leader for interior volume.

The 80's innovative enclosed-bridge design provides the panoramic view of a sky lounge, along with an additional 252 square feet of accommodations. Taking the place of the typical pilothouse area is a large country kitchen with complete galley forward. By relocating the galley, the saloon now provides 377 square feet of space. Forward of the custom dining table is a hutch with wet bar, icemaker, and glass storage. The 42-inch plasma TV is relocated to the forward bulkhead, and additional buffet and china stowage expand the dining area.

The captain will find excellent visibility through two large window panels with padded mullions. The helm features Hatteras' computer-based systems monitor, which uses touchscreen technology to monitor all ship's systems, including real-time performance data, tank levels, visual and audible alarms, and data logs that provide trending information for engine diagnostics. The 80 also includes a generous electronics allowance, single-lever electronic controls with emergency backups, and twin helm chairs. Owner and guests will cruise in unmatched comfort in the twin elevated lounges. To port of the helm station is a desk with drawers and large chart flat, along with a wet bar, icemaker, refrigerator, and 32-inch pop-up plasma TV.

As strong sales have shown since its introduction in the fall of 2003, the Hatteras 80 Motor Yacht is already a proven hit among offshore cruisers. With the Sky Lounge introduction of 2004, Hatteras will further establish itself as the benchmark in the 80-foot yacht segment.
