## Hatteras Introduces 60 Convertible

 Leading the industry in high-tech sportfish design, Hatteras Yachts has unveiled a new 60ft convertible. Built at the company's new facility in Swansboro, North Carolina, the 60 will be the first Hatteras to feature a completely resin-infused hull and as such represents a paradigm shift for the company. Featuring a mezzanine cockpit, lightweight construction, tumblehome curvature in the hull sides and also available in a tournament edition, all of the components of the 60 have been focused toward Hatteras' trademark philosophy of performance, structural integrity and soft ride.

The 60 includes a performance-enhancing drive train turning eight-blade Nibral propellers. With this package the boat's 1,800 gallons of fuel will provide a 500nm range at 1,950rpm. Her standard 1,550hp Cat C30s give her an anticipated cruise of 30+ knots and a top speed of 35+ knots. The new 60 takes advantage of the boat's 19ft beam, and includes a raised mezzanine level that offers cushioned seating for viewing the action astern, as well as modular drop-in units that allow owners to customize the location of freezers, storage tubs and optional baitwells.

For the avid angler, the Hatteras 60 will also be available in a 60GT Tournament Edition which includes an engine upgrade to 1,800hp and an anticipated top speed of 40+ knots and a cruise of 35+ knots.

The 60 Convertible will debut at the 2007 Miami International Boat Show.
