Hatteras 77 Convertible

The new Hatteras 77 Convertible will appeal to both anglers and pleasure boaters, thanks to its interior layout options and beam, draft, fuel capacity and fine accommodations.

Like all Hatteras yachts, the 77 Convertible is built on a solid-fiberglass hull with Divinycell coring in the decks, bulkheads and hull sides above the waterline. It also features an advanced convex hull design for a smooth ride and optimal performance. The convexity of the bow reduces the impact for a smooth head-sea ride, while the fast taper to flat aft sections improves speed and stability. An exaggerated bow flare works in conjunction with double chines to knock spray down and away. Running strakes that bisect the stagnation line provide increased stability and improved tracking. Hatteras' deep propeller tunnels allow the large propellers to be tucked closer to the hull bottom, improving efficiency and reducing draft.

The 77 Convertible should cruise at 28 to 30 knots with the standard CAT C32 ACERTs. And with a fuel capacity of 3,000-gallons, the 77 Convertible offers unparalleled range – more than 500 nautical miles.

...features an advanced convex hull design for a smooth ride and optimal performance.

Hatteras 77 Convertible SPECIFICATIONS

- LOA: 76'10"
- Beam: 22'
- Draft: 5'3"
- Dry weight: 159,600 pounds
