

## YACHT SPECS

064-070

PRICED AT UNDER \$1 MILLION, HATTERAS HAS CREATED A THREE-STATEROOM SPORTFISHING CRAFT THAT HAS A 40-KNOT TOP SPEED.

# Hatteras 50 Convertible

The flybridge pilot station aboard the Hatteras 50 Convertible qualifies as far more than simply a place to operate the boat. Sure, the pod console features a custom steering wheel and single-lever electronic clutch and throttle controls. And the electronics suite is fully outfitted with depth sounder, chart plotter, VHF and autopilot.

What makes the 50 Convertible's flybridge so versatile is the bench seating that has space for six guests. Friends and family can enjoy the view up top without interfering with the captain's duties, whether those duties entail backing down on a big blue marlin, or cruising down the Intracoastal on the way out to sea. Powered by twin Caterpillar 1,400hp diesel engines, the yacht can reach 40 knots at top speed, but she comfortably cruises at 36 knots.

Inside, the Hatteras 50 Convertible offers a luxurious living space that has generous appeal to both anglers and non-anglers. The proven accommodation plan is one Hatteras has refined and made perfect over many years of building sportfishing yachts, and the builder's expert craftsmen and in-house team of interior décor professionals use only the highest quality materials. And, with the benefit of an optional mid-level galley and a bow

stateroom that offers a queen berth or over/under bunks, owners can customize the 50 Convertible to serve as a weekend getaway for two couples or as a home away from home for the entire family.

The standard three-stateroom, two-bathroom arrangement allows for a master stateroom forward with a queen-size bed and ensuite head. The aft bulkhead in the master stateroom is finished in a Plexi-mirror for a more open feel, and includes a 20-inch LCD television and CD/DVD player. The second bow stateroom includes a queen berth that lifts on pneumatic rams to reveal a huge, cedar-lined storage area. A third stateroom, located to port, features over and under bunks. All staterooms feature individually controlled air-conditioning and are finished in custom cabinetry.

The 50 Convertible is Hatteras' smallest model, yet it is emerging as one of the builder's most exciting offerings. And, with a price of under \$1 million, this well-built sportfishing boat with the renowned Hatteras pedigree must be considered a tremendous value in its class.
